PARA-SHOOT

Hammered Dulcimer Duster

Handmade by
Wolf Hill Woodworking 

To Use

1. Shoot the long paracord end under strings, top to bottom
2. Open microfiber cloth above top strings
3. Holding a cord in each hand, pull cloth through, moving back and forth as you go
4. Thread hooked paracord end through bridge holes or between bridge posts to clean under bridges

Care Instructions

- Hand wash or machine wash in mesh laundry bag, gentle cycle in warm water with mild detergent and only non-chlorine bleach if needed. Hang to dry or tumble dry in mesh bag on low.
- Wash with other microfiber cloths or lint-free fabrics – avoid washing with fabrics containing cotton. Color may bleed.
- DO NOT USE fabric softener, chlorine bleach, dryer balls or dryer sheets. DO NOT IRON.
- Microfiber will pick up lint and dust from everywhere, so for best results, clean dryer lint filter before tumble drying and store in zipper bag between uses.
